

Automatic Three-Side Seal Bag Maker

This automatic bag making machine produces three-side seal bags. It utilizes an integrated control system and multiple stations for efficient and precise bag manufacturing from various plastic films.

Overview

High-Efficiency 3-Side Seal Production

The automatic three-side seal bag maker is a professional-grade solution designed for precision plastic film processing. It features an integrated control system with a user-friendly interface that allows for seamless parameter adjustment and real-time production monitoring. Engineered for versatility, it supports various materials including PE, PP, and OPP, providing reliable sealing and stacking performance.

Technical Capabilities

Integrated Process Stations

- Unwinding
- Sealing
- Cutting
- Stacking

Compatible Materials

PE, PP, OPP

Control & Safety

Safety Equipment

Emergency Stop • Safety Guards

Adjustable Parameters

- Sealing Temperature
- Sealing Pressure
