

Automatic Touchless Tire Changer

This automatic tire changer offers leverless and touchless operation. It is designed to handle a wide range of tire sizes and types for optimal performance.

Product Overview

Professional Automatic Tire Changing Solution

This fully automatic touchless tire changer is engineered for high-efficiency tire shop environments. It features an advanced main shaft system with double-speed adjustment, capable of handling rim sizes from 14 to 30 inches with precision. The machine incorporates automated centering for demounting heads and bead breaker disks, ensuring damage-free operation and improved productivity for professional service centers.

Performance Specifications

Rim Diameter Range	14 - 30 inches
Max. Wheel Diameter	1300 mm
Wheel Width	3 - 13 inches
Operating Pressure	10 bar
Motor Power	0.85 / 1.1 kW
Bead Breaker Force	1400 KG

Key Features

Operational Highlights

- Automatic centering for demounting head
- Adjustable bead breaker disk positioning
- Integrated tire lifter with automatic rotation
- Safety-focused two-hand blast inflation
- Energy-saving auto-stop functionality
- High-strength gearbox design for stiff tires
