

Automatic Transmission for Heavy-Duty Vehicles

This automatic transmission is designed for heavy-duty applications. It features multiple forward gears, a reverse gear, and a torque converter.

Overview

Heavy-Duty Automatic Transmission

This robust automatic transmission is precision-engineered for demanding heavy-duty applications. Designed to provide reliable power transfer and efficient performance, it features a durable casing and a sophisticated shifting mechanism. With integrated torque converter technology, this unit ensures enhanced acceleration and superior towing capacity for professional vehicle operations.

Technical Specifications

Transmission Type	Automatic
Application	Heavy-Duty Vehicles

Features

Key Features

- Multiple forward gears
- Dedicated reverse gear
- Integrated torque converter
- Corrosion-resistant finish

Performance Benefits	Enhanced Acceleration, Improved Towing Capacity, Smooth Shifting, Durable Construction
----------------------	--

Design & Build

Finish

Blue Finish • Corrosion Resistant
