

Automatic Tube Filling and Sealing Machine

This automatic machine is designed for filling and sealing various types of tubes with viscous products. It features a stainless steel construction and a PLC control system with a touchscreen interface.

Overview

High-Efficiency Tube Processing

This automatic tube filling and sealing machine is engineered for the precise filling and hermetic sealing of viscous products such as creams, lotions, and ointments. Featuring a robust stainless steel construction and a sophisticated rotary indexing system, it ensures reliable operation in demanding production environments. The integrated PLC control system with a touchscreen interface allows for seamless operation and adjustment across pharmaceutical, cosmetic, and food industry applications.

Technical Specifications

Industry Suitability

Pharmaceutical • Cosmetic • Food

Construction Material	Stainless Steel
Control System	PLC with Touchscreen Interface
Automation Features	Automatic Feeding, Automatic Orientation, Automatic Filling, Automatic Sealing, Automatic Ejection
System Design	Rotary Indexing System
