Product Overview

High-Efficiency Pallet Wrapping Solution

This fully automatic, heavy-duty turntable stretch wrapping machine is engineered to optimize end-of-line packaging operations. It features advanced tension control and customizable packing designs to ensure product stability while minimizing film material usage. Designed for seamless integration, this unit offers robust construction and intelligent features like automatic height detection and self-protection mechanisms to enhance operational safety and efficiency.

Technical Specifications

Model Number	JT-2000
Turntable Diameter	1500mm / 1800mm
Max. Wrapping Height	2100mm / 2400mm
Max. Wrapping Area	1300 x 1300mm
Max. Wrapping Weight	2000 kg

Performance Metrics

Pre-stretch Tension Range

0 % Min Tension	250 % Max Tension
---------------------------	-----------------------------

Turntable Speed	2-15 rpm
-----------------	----------

Key Features

Operational Features

- Automatic film breaking after cycle completion
- Soft start and stop functionality
- Photocell sensor for automatic height detection
- Mechanical flexible braking for tension control
- Automatic turntable orientation positioning

Design Highlights

12-Roller Support System, Belt-Driven Conveyor, Integrative U-Model Chassis, Imported Electrical Components, Aero Socket Connections
