

Automatic Vacuum Membrane Press for Woodworking

This automatic vacuum membrane press is designed for woodworking applications. It is ideal for pressing PVC membranes onto various wood substrates, creating decorative surfaces for furniture, doors, and other woodworking projects.

Product Overview

Professional Automatic Vacuum Membrane Press

This high-performance automatic vacuum membrane press is engineered for precision woodworking applications, specifically the application of PVC membranes onto various wood substrates. Designed for durability and consistent quality, it ensures uniform pressure distribution to create flawless, decorative surfaces for doors and furniture components. The machine combines a robust build with efficient power management, making it an ideal choice for both mass production environments and intricate design projects.

Technical Specifications

Overall Dimensions	8600 x 1600 x 1300 mm
Worktable Inner Size	2500 x 1100 mm
Maximum Working Thickness	50 mm

Performance Metrics

Operational Efficiency

-0.1 Mpa Min. Working Pressure	28 kw Total Power	5.4 kw Actual Power Consumption
--	-----------------------------	---

Electrical Requirements

Voltage and Phase	380V, 50HZ, 3 Phase
-------------------	---------------------

Logistics

Physical Specifications

Property	Value
Net Weight	1200 kg
Packaging Type	Plastic film
