Overview

High-Efficiency Vacuum Packaging Solution

The DZQ-800C is an advanced automatic vacuum packaging machine engineered for high-volume production environments. By integrating automatic product in-feed conveyors, the system decouples the loading process from the packaging procedure, significantly increasing throughput. Designed for versatility and ease of maintenance, it features tool-free removable sealing bars and an elevated service position for the chamber lid, ensuring seamless operation for various product types.

Technical Specifications

Key Features

- Automatic product in-feed conveyors
- Manual sealing height adjustment
- Tool-free removable sealing bars
- Elevated service position for chamber lid
- Dual-side loading capability

Model	DZQ-800C
Sealing Bars	2

Compliance & Standards

Certifications	CE, UL, IEC
----------------	-------------

Applications

Suitable Applications

Food Processing • Pharmaceuticals • Electronic Components • Seafood • Meat Packaging

Construction & Design

Safety Systems

- Emergency stop buttons
- Overload protection

Construction Material

Stainless Steel
