

Automatic Vertical Form Fill Seal Machine

This machine is a vertical automatic packing machine that performs bag forming, measuring, filling, sealing, cutting, and product output. Intelligent optical tracking ensures accurate logo positioning.

Overview

Versatile Vertical Form Fill Seal Solution

This automatic vertical form fill seal machine offers high-precision packaging for granular products across food, medicine, and chemical industries. Engineered for efficiency, it performs integrated steps including bag forming, measuring, filling, sealing, and cutting. With a user-friendly design and robust construction, it ensures reliable performance and easy maintenance in high-volume production environments.

Performance Metrics

Key Operating Metrics

60 bags/min

Max Speed

2 %

Filling Precision

Technical Specifications

Model Specifications

Model	Capacity	Power	Weight
YZDS100G	<100g	1.5KW	300
YZDS500G	100-500g	2.3KW	360
YZDS1000G	200-1000g	2.3KW	380

Packaging Forms

Back sealing, 3-sides sealing, 4-sides sealing, Pillow pack

Operational Details

Applicable Materials

- Puffed food
- Fried food
- Peanuts
- Melon seeds
- Granules
- Desiccant
- Seeds

Power Supply

110/220V 60/50HZ
