

# Automatic Vinegar Bag Filling and Sealing Machine

This automatic vertical form fill seal (VFFS) machine is designed for packaging liquids like vinegar into flexible bags. The machine automates forming, filling, and sealing, ensuring consistent and accurate packaging.

## Overview

### High-Efficiency Liquid Packaging Solution

This automatic liquid packaging machine is designed for the streamlined, hygienic filling and sealing of various liquids, including vinegar, soy sauce, juice, and milk. It automates the entire process from film molding and quantitative filling to ink printing and final sealing. Constructed with stainless steel contact parts and featuring UV film disinfection, it ensures compliance with food hygiene standards while delivering consistent, high-speed production.

## Performance Metrics

### Production Efficiency

**2000 bags/h**

Bags per Hour

### Filling Accuracy

1.5 %

## Technical Specifications

### Packaging Weight Range

200-500 g/bag

### Power Consumption

1.2 Kw

### Voltage

220V, 380V

## Physical Dimensions

### Device Weight

350 kg

### Dimensions (L x W x H)

1057 x 750 x 1850 mm

## Film Specifications

### Film Thickness

0.08 mm

### Film Width

320mm (240mm)

## Features

### Key Features

- Stainless steel contact parts
- UV film disinfection system
- Surge tank and self-priming pump
- Automatic production date ribbon printing
- Electro-optical tracking
- Dorsal closure sealing
