

Automatic Washing and Drying Machine

This appliance offers both washing and drying capabilities in a single unit. It features multiple wash cycles, customizable settings, a stainless steel drum, and a lint filter.

Product Overview

Professional Automatic Washing and Drying Solution

This full automatic washing and drying machine is designed for efficient, thorough cleaning across various fabric types. Engineered with a compact footprint to maximize utility in limited spaces, it combines robust construction with intuitive controls. Features like the stainless steel drum and integrated lint filtration ensure consistent, long-lasting performance for professional environments.

Key Features

Core Capabilities

- Full automatic washing and drying operation
- Customizable wash cycles
- Advanced lint filtration system
- Integrated safety lock mechanism

Technical Construction

Drum Construction	Stainless steel
