

Automatic Water Level Control Switch

This electric pump float switch offers automated water level management. Its durable construction incorporates an adjustable cable and a reliable switching mechanism.

Product Overview

Automatic Water Level Control Switch

This electric pump float control switch provides reliable, automatic management of water levels in various liquid storage systems. Designed for longevity and performance, it is suitable for use in wells, tanks, and diverse liquid environments. The system ensures efficient pump operation based on real-time water levels, simplifying fluid management for professional and industrial applications.

Technical Specifications

Rated Current

10 A

Rated Current

4 A

Resistive Current

Protection Grade

IP 68

Rated Voltage

220V AC

Rated Frequency

50 Hz

Max Operating Temperature

85 °C

Build Quality

Key Features

- Durable construction
- Adjustable cable length
- Reliable switching mechanism
- Waterproof housing
