

Automatic Water Pressure Booster Pump

The automatic water pressure booster pump increases water pressure in residential and light commercial settings. Its robust motor ensures reliable performance, while the automatic control system maintains consistent pressure.

Product Overview

High-Performance Booster Pump

This automatic water pressure booster pump is designed to provide consistent, reliable pressure for both residential and light commercial water systems. Engineered for efficiency, the system features advanced cooling for the pumped liquid and integrated sealing to ensure long-lasting durability. Its compact design and automatic control system make it an ideal solution for improving water flow in showers, taps, and other essential outlets.

Key Features

Core Features

- Automatic pressure control system
- Enhanced liquid cooling system
- Low-noise operation
- High-performance sealing technology
- Integrated floating ball exhaust valve

Application

Suitable Applications

Residential Water Systems, Light Commercial Use, Shower Pressure Boosting, Tap Flow Optimization

Performance

Operational Highlights

Quiet Operation • Durable Construction • Automatic Activation • Optimized Cooling
