

Automatic Wire Cutting and Stripping Machine

This automatic wire stripping machine handles wires from 32AWG to 14AWG. The system uses a microcomputer and LCD operating system to complete cutting and stripping in one cycle, and it can also perform front half stripping with twisted wire.

Product Overview

High-Efficiency Wire Processing

This automatic wire cutting and stripping machine utilizes a hybrid drive microcomputer and a full LCD operating system for precise, one-time completion of wire preparation tasks. It features advanced capabilities like front-half stripping with twisted wire protection to ensure the integrity of your materials. Designed for versatility, the machine supports a wide range of wire specifications and offers adjustable settings for both head and tail stripping.

Performance Metrics

Processing Speed

8000 pcs/hour

Max Throughput

Technical Specifications

Compatible Wire Gauge	30AWG-14AWG, 32AWG-14AWG
Cutting Length Range	9999.9 mm
Stripping Precision	0.1 mm
Drive System	Mute hybrid stepping motor
Blade Material	Tungsten Steel / High Speed Steel

Stripping Capabilities

Stripping Configuration

Feature	Range
Strip Head	1-50mm
Strip Tail	0.1-30mm
