

Automatic Wooden Bead Polishing Machine

This automatic machine is designed for polishing wooden beads. It features variable speed control and a robust construction for consistent polishing.

Product Overview

High-Efficiency Wooden Bead Polisher

This automatic wooden bead polishing machine is engineered to deliver high-quality surface finishing for various bead sizes. Featuring manual adjustable speed controls, it provides the versatility needed for different material requirements and production workflows. Its design supports high-volume throughput, making it a reliable solution for efficient woodworking and bead manufacturing operations.

Technical Specifications

Batch Capacity (20mm beads)

65 pcs

Pieces per batch

Polishing Diameter Range	65 mm
Minimum Polishing Diameter	5 mm

Operational Features

Automation

Automatic

Speed Control	Manual adjustment
