

Automation Tubular Motor

This high-performance tubular motor is designed for automation and control applications. The compact cylindrical design integrates a motor and gearbox.

Product Overview

High-Performance Automation Control

This high-performance tubular motor is precision-engineered for diverse automation and control applications. It features a compact cylindrical design that integrates both the motor and the gearbox, ensuring a space-saving footprint. Built for reliability and efficiency, it is an ideal solution for a wide range of industrial and commercial installation environments.

Technical Specifications

Suitable Uses

- Industrial Automation
- Commercial Control Systems

Motor Design	Integrated tubular
Components	Internal Gearbox, Cylindrical Housing, Automation Ready
