

Automation Tubular Motor

High-performance tubular motor designed for automation applications. Its robust construction ensures reliable operation in roller shutters, awnings and projection screens.

Product Overview

High-Performance Automation Motor

This high-performance tubular motor is specifically engineered for professional automation applications requiring reliability and precision. Its compact design and robust construction ensure seamless integration into various systems, including roller shutters, awnings, and projection screens. The unit delivers smooth, quiet operation with enhanced control capabilities to meet the demanding standards of modern installation environments.

Technical Specifications

Key Performance Attributes

- Compact form factor
- Robust heavy-duty construction
- Whisper-quiet operation
- Precise motion control

Primary Applications

Roller Shutters, Awnings, Projection Screens
