Overview

High-Performance Automotive AC Compressor

This 12V air conditioning compressor is engineered for high-efficiency cooling in premium vehicle climate control systems. Designed specifically for V6 engine configurations, it ensures reliable refrigerant circulation using R134a. Its robust construction and precision-machined clutch assembly provide a durable solution for maintaining optimal cabin comfort in demanding conditions.

Technical Specifications

Refrigerant Type

R134a • HFC134a

Operating Voltage

12 V

Lubricant Type

PAG Oil

Key Features

Belt-Driven, V6 Engine Compatible, High Pressure Resistant, Quiet Operation

Clutch Assembly

Pulley Type

6 PK

Grooves (PK)

120 mm

Pulley Diameter
