

Automobile Air Conditioning Condenser

This condenser is designed for automotive air conditioning systems, dissipating heat from the refrigerant. It features durable construction for long-lasting performance and efficient cooling.

Product Overview

High-Efficiency Automotive Condenser

This automotive air conditioning condenser is engineered for superior heat transfer, effectively converting high-pressure refrigerant gas into a high-pressure liquid. Featuring a durable aluminum alloy construction, it offers excellent corrosion resistance and long-lasting performance. Its parallel flow design, incorporating multiple horizontal tubes and vertical fins, maximizes surface area to ensure optimal cooling efficiency for your vehicle's climate control system.

Compatibility

Compatible Vehicle Models

Vehicle Model	Engine	Year Range
Cadillac Escalade	V8 6.0L	2002-2006
Cadillac Escalade	V8 5.3L	2002-2005

Technical Specifications

Core Dimensions

890 mm
Length

432 mm
Width

16 mm
Depth

Design Features

Parallel Flow • Corrosion Resistant • High-Efficiency

OEM Reference Number	52475996
DPI Number	3026
Material	Aluminum Alloy
