

Automobile Aluminum Sunroof Guide Rail

This is an aluminum guide rail designed for automotive sunroofs. It allows the sunroof to slide smoothly.

Product Overview

Automobile Aluminum Sunroof Guide Rail

This high-precision aluminum sunroof guide rail is engineered for automotive skylight systems, ensuring smooth and reliable operation. Designed for durability and performance, it serves as a critical component in modern vehicle sunroof assemblies. The part is crafted to meet rigorous automotive standards, offering seamless integration into custom car part configurations.

Technical Details

Category

Automotive Parts • Sunroof Components • Aluminum Extrusion

Material

Aluminum

Primary Application

Automotive Skylight / Sunroof System

System Compatibility

Compatible System Parts

- Sunroof wind deflectors
- Rubber seal components
- Stamped door sills
- Shaped structural beams
