Product Overview

Structural Support and Safety

This automobile bumper mounting bracket is engineered for critical structural support and impact absorption within vehicle safety systems. Constructed from high-strength composite material, it offers superior durability and weather resistance to withstand the rigors of daily driving. The design includes precise mounting points to ensure secure attachment and optimal alignment with bumper components, meeting strict fit and finish standards for reliable front-end protection.

Technical Specifications

Material	High-strength composite plastic
Color	Black
Key Features	Impact absorption, Weather-resistant, OEM fitment, Molded structural ribs
