

# Automobile Chassis Side Bar

This automobile chassis component is designed for enhanced stability and performance. Crafted from high-quality materials, it provides durability and reliable support in various driving conditions.

**SIDE BAR**  
**PLSD-65**  
**Product Description:** Length: 6.035", Width: 2", Height: 1.250", C to C: 3.99", Hole Size: 1.063", Lock Hole: 1/2"

## ADDITIONAL IMAGES

## Product Overview

### Automobile Chassis Side Bar

The PLSD-65 side bar is a precision-engineered chassis component designed for enhanced vehicle stability and safety. Crafted from high-quality, durable materials, it provides superior reinforcement to the chassis system for improved structural integrity. This part is designed for seamless integration into existing vehicle architectures, ensuring reliable performance across varied driving conditions.

## Dimensions

### Key Dimensions

**6.035 in**

Length

**2 in**

Width

**1.25 in**

Height

### Mounting Specifications

Feature	Measurement
Center to Center Distance	3.99 inches
Hole Size	1.063 inches
Lock Hole Size	0.5 inches

## Compatibility

### Model Identifier

PLSD-65

## Application Details

### Component Type

Automotive, Chassis Component, Structural Reinforcement
