Product Overview

Precision Engine Component

This cylinder liner is engineered to meet OEM quality standards, providing a durable and wear-resistant surface for engine cylinders. Designed specifically for Toyota 4Y engines used in Hiace, pick-up trucks, and forklifts, this component ensures optimal heat dissipation and corrosion resistance. It is suitable for professional maintenance and engine rebuilding applications.

Compatibility & Application

Compatible Applications

Toyota Hiace, Toyota Pick Up, Toyota Forklift, 4Y Engine
