Product Overview

High-Performance Intake Manifold

This automobile engine intake manifold is engineered for optimized airflow and improved volumetric efficiency, contributing to better engine performance. Constructed from durable, heat-resistant PA6-GF30 polymer with an aluminum lower section, it ensures long-term reliability. The kit includes essential components such as the thermostat housing, thermostat, and gaskets for a comprehensive installation solution.

Technical Specifications

Engine Displacement

4.6 L

Engine Size

Material	PA6-GF30 Polymer with Aluminum lower section
Part Number	XTJ-062A
Cross Reference Numbers	1L2Z9424FA, 1W7Z 9424-AB, 01949503392, 615-175

Compatibility

Compatible Models

- Crown Victoria
- Grand Marquis
- Town Car
- Explorer

Production Years	1990-1997, 2002-2010
------------------	----------------------

Logistics & Quality

Certifications

ISO/TS16949

Warranty

12 Months

Minimum Order Quantity

10 pcs

Lead Time

15-30 days
