

Automobile Engine Turbocharger K03

The K03 turbocharger enhances engine performance by forcing more air into the combustion chamber. It features a robust design and precision engineering to withstand high temperatures and pressures.

Product Overview

High-Performance K03 Turbocharger

The K03 turbocharger is engineered to significantly enhance automobile engine performance by increasing air intake into the combustion chamber. This unit provides optimal boost pressure, leading to improved horsepower and torque for a more efficient driving experience. Built with a robust design, it features a durable turbine housing, compressor housing, and central rotating assembly capable of withstanding high temperatures and pressures.

Technical Identifiers

Model	K03
Part Number	53039880017
OEM Number	078145702S

Key Features

Core Components

- Turbine Housing
- Compressor Housing
- Central Rotating Assembly

Performance Metrics

Performance Gains	Increased Horsepower, Improved Torque, Enhanced Engine Efficiency, Optimal Boost Pressure
