Product Overview

Efficient Cabin Heating Solution

This automobile heater core is a radiator-like device designed to provide reliable cabin heating by circulating hot engine coolant. Featuring a compact design with aluminum fins, it ensures efficient heat transfer for optimal passenger comfort. Constructed from durable materials, this unit is built to withstand high temperatures and pressures, offering a direct replacement for original equipment.

Technical Specifications

Core Dimensions

195 mm
Length

145 mm
Width

42 mm
Depth

Reference Part Numbers

Reference Type	ID
TS Number	6278128
Nissens	6278128

Construction Materials

Aluminum, Durable Metal

Compatibility

Vehicle Fitment

- Ford Fiesta
