

Automobile Interior Sun Shade

Automobile sun shades are designed to protect car interiors from direct sunlight and heat. Featuring a reflective surface, these shades minimize heat absorption and UV radiation.

Product Overview

Professional Vehicle Sun Protection

This automobile laser sun shield is engineered for high-performance heat insulation and UV protection. Constructed from high-density 270 g/m² laser and aluminum foil material, it effectively refracts solar radiation to maintain a cooler vehicle interior. Designed with durability in mind, it features reinforced sewing, a U-shaped cutout for rear-view mirror clearance, and swallow-tail suction cups for secure, reliable installation.

Technical Specifications

Key Features

- UV Protection
- Heat Insulation
- Foldable Storage
- U-shaped Rear-view Mirror Cutout
- Swallow Tail Suction Cups

Material Density	270 g/m ²
Material Composition	Laser Material, Aluminum Foil

Quality & Compliance

Certifications

ISO 9001:2008 • TS 16949:2009
