

Automobile Radio Antenna

This is an automobile radio antenna designed for receiving radio signals. It has a flexible whip and durable construction for reliable performance.

Overview

Automobile Radio Antenna

This high-performance automobile radio antenna is engineered to provide clear and consistent signal reception for vehicle audio systems. Featuring a flexible whip design, it is built to withstand various environmental conditions while maintaining optimal connectivity. Designed for straightforward installation, this antenna is an essential component for reliable in-car radio performance.

Technical Specifications

Model Number	YJ0019
Product Type	Radio Antenna
Design Features	Flexible Whip, Durable Construction, Easy Installation
Primary Application	Automobile
