

# Automobile Side Step Running Boards

These automobile running boards facilitate easier vehicle entry and exit. Their durable construction includes a non-slip surface to ensure secure footing.

## ADDITIONAL IMAGES

## Product Overview

### Rugged Side Access Solution

These automobile side step running boards are engineered from thickened aluminum alloy for superior structural integrity and longevity. Designed as a vehicle-specific fitment, they provide a secure and convenient step for easy entry and exit, especially for SUVs and trucks. The aerodynamic profile not only enhances the vehicle's off-road aesthetic but also offers added protection against road debris while ensuring a non-slip surface in all weather conditions.

## Technical Specifications

Material	Thickened Aluminum Alloy
Installation Style	Non-destructive, special vehicle fit

## Key Features

### Design Style

Off-road style • Aerodynamic • Sleek integrated design

### Safety Attributes

Non-slip surface, Weather resistant, Durable construction
