Product Overview

High-Performance Automotive AC Condenser

This precision-engineered condenser is designed for efficient heat transfer in automotive air conditioning systems. Featuring a durable construction with an optimized fin and tube design, it ensures maximum cooling capacity and reliable performance under demanding operating conditions. It is built to meet or exceed OEM specifications, providing a perfect fit and long-lasting durability for vehicle climate control.

Technical Specifications

Core Size

598 mm

Width

638 mm

Height

16 mm

Thickness

Carton Size

795*60*690 mm

Compatibility

Compatible Models

- Nissan Patrol

Identification

Product Identifiers

Reference Type	Value
TS Number	88-73059

Features

Key Features

High-Performance • Durable Construction • Optimized Fin Design • Easy Installation • OEM Fit
