Product Overview

High-Performance Automotive AC Compressor

This automotive air conditioning compressor serves as a critical component for vehicle climate control systems. It is engineered to compress refrigerant and circulate it efficiently, ensuring reliable cooling performance in diverse automotive applications. Designed for durability, the unit features robust construction with multiple mounting points for secure installation and a belt-driven pulley system for effective power transfer.

Technical Specifications

Primary Function	Refrigerant compression and circulation
Drive Type	Belt-driven pulley
Mounting	Multiple mounting points, Secure installation
Control Connection	Yes
