

# Automotive Air Conditioning Compressor

This automotive air conditioning compressor is designed for efficient and reliable performance. It is constructed from cast aluminum with multiple ports and a pulley system for belt-driven operation.

## Product Overview

### High-Performance Automotive AC Compressor

This automotive air conditioning compressor is engineered for efficient and reliable cooling performance in demanding vehicle environments. Constructed from durable cast aluminum, the unit is built to withstand rigorous daily use while maintaining optimal refrigerant compression. It features a robust design with integrated ports for seamless refrigerant line connection and a reliable pulley system for smooth belt-driven operation.

## Technical Specifications

Material	Cast Aluminum
Drive Type	Belt-driven
Primary Application	Automotive Air Conditioning
Key Features	High Efficiency, Robust Construction, Durable Design
