

Automotive Air Conditioning Condenser

This condenser is designed for automotive air conditioning systems. It efficiently dissipates heat, ensuring optimal cooling performance and reliable operation.

Product Overview

High-Performance Automotive Condenser

This automotive air conditioning condenser is precision-engineered to ensure optimal thermal management for vehicle climate control systems. Designed for durability and efficient heat dissipation, it converts refrigerant from a gas to a liquid state effectively. Its robust construction offers excellent corrosion resistance, promoting a long service life and reliable operation in demanding automotive environments.

Technical Specifications

Core Dimensions	450 x 566 x 16 mm
Compatible Vehicle Models	L200
Model Years	2006 onwards

Cross Reference

Reference Identification

Reference Type	Code
NISSENS	88-72013
