

Automotive Air Conditioning Control Switch

This automotive A/C control switch integrates into vehicle dashboards. The switch controls the air conditioning system, offering on/off functionality.

Product Overview

Reliable Climate Control Solution

The RTK-1006 is a high-quality automotive air conditioning control switch designed specifically for vehicle dashboard integration. It features a durable black plastic housing built to withstand the rigors of daily automotive use while providing a user-friendly interface for climate control. This switch ensures reliable on/off functionality for air conditioning systems in compatible vehicle models.

Technical Identification

OE Number
84660-OK010

Model Number	RTK-1006
