

Automotive Air Conditioning Push Button Switch

This automotive air conditioning switch controls the A/C system in a vehicle. It features a push-button actuator and connects to a wiring harness.

Overview

Reliable Automotive A/C Control

This automotive air conditioning push-button switch is engineered for precise control of vehicle climate systems. Designed specifically for compatibility with GM Tracker models, it facilitates the seamless operation of the A/C compressor and blower fan. The unit features a durable rectangular housing and a pre-wired harness for straightforward installation into the vehicle's dashboard or console.

Technical Identification

OE Number
95571-60A50

Compatible Models	GM Tracker (1992)
-------------------	-------------------

Design & Construction

Switch Type	Push Button Actuator
Housing Style	Rectangular Black Housing

Wiring & Connectivity

Wiring Harness Details

- Multi-colored wire leads (Black, Pink, White, Light Blue)
- White connector housing
- Green terminal interfaces

Functional Specifications

System Controls

- A/C Compressor Activation
- Blower Fan Control
- Climate System Management

Installation

Mounting Location	Dashboard or Center Console
