Product Overview

High-Performance Automotive Filtration

This automotive air filter is engineered to provide superior engine protection by effectively capturing harmful particles and contaminants. By ensuring a consistent supply of clean air for the combustion process, it helps optimize engine performance and fuel efficiency. The filter is manufactured under strict quality standards to ensure durability and reliability for various automotive applications.

Certifications

Quality Standards

ISO/TS16949

Multilingual Compatibility

International Identifiers

- Hava Filtresi (Turkish)
- >RUSIAN) D8;LB@ (Russian)
- Filtro de ar (Portuguese)
- z@tir(ese)
- Filtres à air (French)
- Filtros de aire (Spanish)
- Luftfilter (German)

Cabin Air Quality

Cabin Filtration Features

- Dust and pollen capture
- Odor protection
- Allergen reduction
- Improved passenger comfort
