

Automotive Air Filter

This rectangular air filter features a black plastic frame and white pleated filter media. It is designed to trap airborne particles, ensuring optimal engine performance and longevity.

Product Overview

High-Efficiency Automotive Filtration

This automotive air filter is engineered to maintain engine health by effectively cleaning intake air, fuel, and oil. Featuring a rectangular design with a durable black plastic frame and high-density pleated filter media, it maximizes surface area for superior particle capture. The molded edges ensure a precise, secure fit within the vehicle's housing, protecting the engine from dust, pollen, and other airborne contaminants.

Technical Specifications

Construction Materials

- Black plastic frame
- Pleated filter media

Design Features

Pleated Media • Molded Edges • Secure Fit

Filter Shape	Rectangular
Filtration Targets	Dust, Pollen, Airborne Particles
