

# Automotive Alternator

This high-performance alternator is designed for automotive use. It provides reliable electrical power for vehicle systems, ensuring optimal performance and longevity.

## Product Overview

### High-Performance 24V Alternator

This automotive alternator is engineered for heavy-duty vehicle systems, providing a reliable 60A power output. Designed specifically for compatibility with HINO J08C engines, it features a robust double pulley system for efficient power transmission. Its durable construction ensures long-term performance and stable electrical supply for professional automotive applications.

## Technical Specifications

### Electrical Performance

**24 V**

Voltage

**60 A**

Rated Current

### Pulley Configuration

Double Pulley

## Compatibility & Identification

### Engine Compatibility

HINO J08C

### OEM Number

27040-1950

## Key Features

### Core Advantages

- Robust construction for longevity
- Efficient cooling design
- Optimized for 24V vehicle systems
- High-performance power delivery
