

Automotive Alternator

This alternator is designed for automotive applications. It features robust construction for efficient power generation and reliable operation.

Overview

High-Performance Automotive Alternator

This 12V automotive alternator is engineered to provide a consistent 110A charging output, supporting the demanding electrical systems of modern vehicles. Designed to meet or exceed OEM specifications, it features a robust construction and a double pulley system for reliable operation and longevity. It is an ideal replacement part for specific Hyundai and Kia diesel engine models, ensuring optimal power generation.

Technical Specifications

Voltage

12 V

Rated Voltage

Rated Current

110 A

Output Current

Pulley Configuration

Double Pulley

Compatibility & Fitment

OEM Reference Numbers

37300-42360 • A3T04999

Compatible Vehicles

- Hyundai H100 2.5D (D4BH engine)
- Mitsubishi L200
- Kia K2500
- Kia Pregio 2.5

Quality & Construction

Key Features

Robust Construction, Efficient Power Generation, Reliable Operation, OEM Standard
