

Automotive Alternator Fan Motor

This fan motor is designed for automotive alternator systems, specifically for cooling electronics. It features a durable black housing and includes connectors for straightforward installation.

Product Overview

Automotive Alternator Fan Motor

This automotive alternator fan motor is engineered for reliable cooling performance in vehicle electronics and connectivity systems. Featuring a robust black housing and integrated wiring with connectors, it is designed for straightforward installation and aftermarket replacement. The unit supports both 12V and 24V electrical systems, making it a versatile choice for various automotive applications.

Technical Specifications

Model Number	CF-0826
Power Rating	80 W
Compatible Voltages	12V, 24V
