Overview

High-Performance Automotive Alternator

This high-performance alternator is specifically engineered for L200 2500 models, providing reliable electrical power to vehicle systems and ensuring efficient battery recharging. Designed to meet or exceed OEM specifications, the unit features robust construction with a durable metallic housing and advanced internal components for stable voltage regulation. It includes integrated electrical connectors for seamless installation and optimal charging performance.

Electrical Specifications

Rated Current

80 A

Output Current

Voltage

12 V

Mechanical Specifications

Pulley Configuration

2Z-70
