Overview

High-Performance Automotive Wiring Solutions

The WP series is a comprehensive waterproof trailer cable harness kit engineered for demanding automotive and outdoor environments. Featuring a robust IP67 rating, these harnesses ensure reliable electrical connectivity even in harsh weather conditions. Designed for versatility, the series supports a wide range of lighting components including tail, fog, and reverse lights, making it an ideal choice for professional trailer and vehicle wiring applications.

Technical Standards

Ingress Protection

IP67 Waterproof

Compliance & Certifications

ISO 11446, ISO 1724, REACH Compliant, PAHS Compliant

Design & Construction

Key Features

- Sealed connectors to prevent water ingress
- T-shaped junctions for efficient signal distribution
- Weather-resistant black cable insulation
- Integrated central distribution box
- Secure wire terminations

Application

Supported Lighting Components

- Tail Lights
- Side Markers
- License Plate Lights
- Turn Signals
- Fog Lights
- Reverse Lights
- Stop Lights

Primary Application

Automotive and Trailer Wiring Systems
