## Product Overview

### Professional Diagnostic Tool

This 12V LED digital battery and alternator tester is an essential diagnostic tool designed for quick and efficient automotive maintenance. It provides immediate visual feedback on battery charge levels and alternator performance through intuitive LED indicators. Compact and portable, this device features color-coded alligator clips for secure and easy connection to battery terminals, making it ideal for professional mechanics and automotive enthusiasts alike.

## Technical Specifications

### Safety Features

- Defective battery detection (below 9.9V)
- Color-coded alligator clips
- Visual LED status indicators

Voltage Compatibility	12V
Certifications	CE

## Diagnostic Indicators

### Alternator Status Indicators

Fault • Good

### Battery Charge Levels

Full • Middle • Low
