

Automotive Battery Charger and Jump Starter

This portable device charges batteries and provides jump-start assistance. It features robust construction, an easy-to-read display, multiple charging modes, and safety features like overload protection.

Product Overview

Professional Automotive Power Solution

This portable battery charger and booster is engineered for high-performance automotive applications. It provides versatile charging modes to support various lead-acid battery types while offering reliable jump-start assistance for vehicles with discharged batteries. Built with robust construction and integrated safety features like overload protection, it ensures both durability and safe operation in professional environments.

Technical Specifications

Battery Compatibility

- Lead-acid batteries

Model Identifier	HIGHER-600
Primary Application	Automotive, Battery Charging, Jump Starting

Safety & Features

Safety Features

Overload Protection

Design Highlights

- Portable design
- Robust construction
- Easy-to-read display
