

Automotive Blade Fuse Holder

This in-line fuse holder is designed for automotive applications, providing protection for electrical circuits. The medium-sized fuse holder features a durable black housing and a secure cover to protect the fuse from environmental factors.

Product Overview

Automotive Circuit Protection

This medium-sized in-line fuse holder is engineered to provide essential protection for automotive electrical circuits and devices. Featuring a durable black housing and a secure protective cover, it safeguards the fuse against environmental factors such as dust and moisture. It is a reliable solution designed to prevent potential damage caused by overcurrent or short circuits in various vehicle applications.

Technical Details

Compatible Fuse Type	Standard Blade Fuse (Medium)
Typical Applications	Automotive, Cars, Trucks, Electrical Circuits

Design Features

Construction Features

- Durable black housing
- Secure protective cover
- In-line design
- Environmental protection
