

Automotive Blower Motor Resistor

This blower motor resistor controls the speed of the blower motor in a vehicle's heating and air conditioning system. It regulates the voltage supplied to the blower motor, allowing the driver to select different fan speeds.

Product Overview

High-Performance Blower Motor Resistor

This automotive blower motor resistor is a critical component for vehicle heating and air conditioning systems, designed to regulate the voltage supplied to the blower motor. By controlling the electrical current, it allows drivers to reliably adjust fan speeds for optimal cabin climate control. Engineered with durable materials and integrated heat management, this unit ensures consistent performance and longevity in demanding automotive environments.

Technical Details

OE Reference Number	27150-5T000
Alternate OE Number	271505T000

Compatibility

Compatible Vehicle Models	Nissan Serena, Nissan Sentra
---------------------------	------------------------------

Design & Construction

Key Features

- Integrated heat sink for thermal management
- Durable black plastic housing
- Standardized electrical connector interface
- Resistive element designed for heat dissipation
