

# Automotive Booster Cables

These booster cables are designed for jump-starting vehicles with discharged batteries. They are available in various amperage ratings and cable lengths, and feature color-coded clamps for secure connections.

## Product Overview

### High-Performance Booster Cables

These heavy-duty booster cables are engineered for reliable jump-starting of vehicles with discharged batteries. Designed for versatility, they are available in a wide range of amperage ratings and lengths to accommodate various vehicle sizes, from passenger cars to heavy-duty machinery. With options for copper, copper-clad aluminum, and aluminum conductors, these cables ensure efficient power transfer and secure connections for automotive, marine, and agricultural applications.

## Technical Specifications

### Available Lengths

- 2.0M
- 2.5M
- 2.8M
- 3.0M
- 3.0M
- 4.5M
- 5.0M
- 6.0M
- 7.0M
- 16FT

### Amperage Ratings

30A, 50A, 100A, 150A, 200A, 300A, 400A, 500A, 600A, 700A

### Cable Gauge (Cross-Section)

3.3mm<sup>2</sup>, 5mm<sup>2</sup>, 10mm<sup>2</sup>, 16mm<sup>2</sup>, 25mm<sup>2</sup>, 35mm<sup>2</sup>, 50mm<sup>2</sup>, 70mm<sup>2</sup>

## Construction & Safety

### Conductor Materials

Copper (CU) • Copper-Clad Aluminum (CCA) • Aluminum (AL)

### Safety Features

Surge Protection, Heavy-duty Insulation, Color-coded Clamps

## Compliance

### Certifications

CE • GS • TUV
