

Automotive Brake Caliper

This is a brake caliper designed for automotive braking systems. It applies pressure to the brake pads, which in turn contact the brake rotors to stop the vehicle.

Product Overview

Automotive Brake Caliper

This automotive brake caliper is designed for precision braking performance. It features specific mounting dimensions and pad area configurations optimized for reliable vehicle deceleration. This component is engineered to meet standard automotive fitment requirements.

Technical Specifications

Mounting Position	Standard Automotive
Pitch Joint	Standard
Caliper Diameter	Standard
Pad Area	Standard
