

Automotive Brake Light Switch

This assortment of brake light switches is designed for various automotive applications. Each switch is engineered to accurately detect brake pedal activation and reliably signal the brake lights.

Product Overview

Reliable Brake Light Activation

This automotive brake light switch is engineered to accurately detect brake pedal activation and reliably signal the brake lights. Designed with robust materials for long-lasting performance, it ensures critical vehicle safety through precise actuation. The switch is available in various configurations, making it compatible with a wide range of vehicle makes and models for versatile application.

Technical Specifications

Safety Function

Essential Safety Component • Brake Light Signal Integrity

Application

Automotive Brake Systems

Key Features

Precise Actuation, Durable Construction, Easy Installation, High Reliability
