Product Overview

High-Performance Brake Lining

This automotive brake lining is engineered for commercial vehicles and heavy-duty trucks, providing consistent stopping power and reduced brake fade. Designed with advanced friction materials, it ensures reliable and safe braking performance under diverse driving conditions. The lining features precision-drilled holes for secure attachment and enhanced heat dissipation, promoting durability and optimal efficiency.

Certifications & Compliance

Quality Certifications

ISO/TS 16949:2002, ECE-R90

Technical Features

Key Features

- Advanced friction material composition
- Precision-drilled holes for heat dissipation
- Designed for heavy-duty applications
- Curved edge design for proper fitment
- Engineered for durability and heat resistance

Target Application

Commercial Vehicles • Heavy-Duty Trucks
