Overview

High-Performance Braking Solution

These automotive brake pads are engineered for commercial vehicles and heavy-duty trucks, delivering reliable stopping power and consistent performance. Designed with advanced friction materials, they provide excellent heat dissipation, reduced noise, and extended service life. The pads are built to meet or exceed OEM specifications, ensuring safety and durability under various driving conditions.

Certifications & Standards

Quality Certifications

ISO/TS 16949:2002, ECE-R90

Technical Details

Key Features

- Wear indicator clip included
- Steel backing plate with secure attachment points
- Reduced rotor wear
- Low noise and vibration operation

Friction Material

Advanced Ceramic

Application

Target Vehicles

Commercial Vehicles • Heavy-Duty Trucks
